Install an unsigned driver on Windows 8
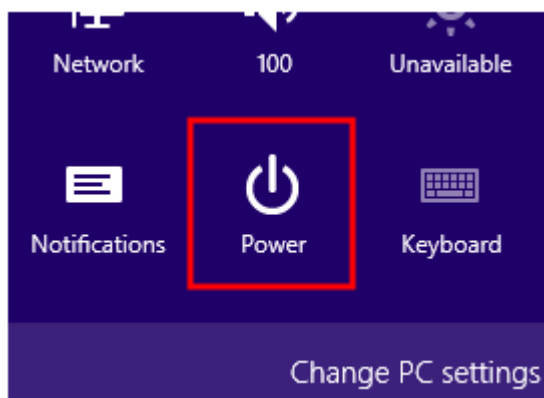

Windows 8 by default will not let you install unsigned drivers. In order to install an unsigned driver, you can follow the steps shown below to start Windows 8 in "Disable Driver Signature Enforcement" mode.
 Move the cursor over the top or bottom right corner or the screen and it will show extra options on the right side of the screen (This is the new Charm Bar in Windows 8). Choose the Settings option (icon looks like a Gear).

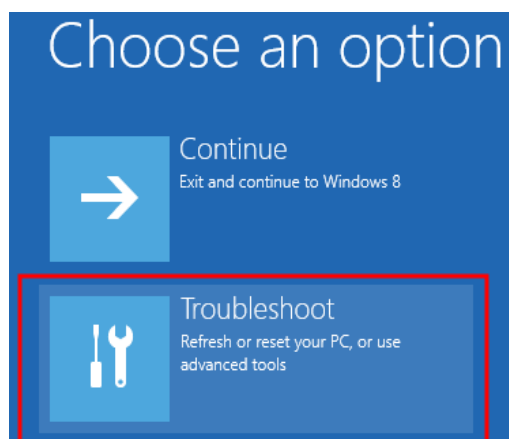

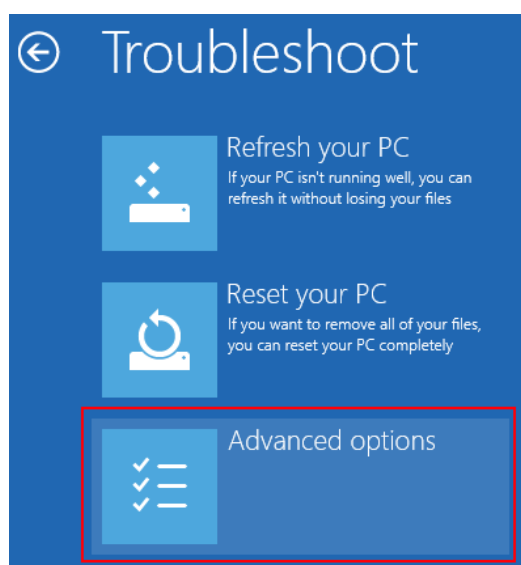

Choose Power Option

Choose General on the left hand side and then click Restart now button on the righ

Advanced startup

Start up from a device or disc (sucl
startup settings, or restore Windov

Restart now

Click to troubleshoot

Choose an option

→ Continue
Exit and continue to Windows 8

Troubleshoot
Refresh or reset your PC, or use
advanced tools

Click on Avanced Options

← Troubleshoot

Refresh your PC
If your PC isn't running well, you can
refresh it without losing your files

Reset your PC
If you want to remove all of your files,
you can reset your PC completely

Advanced options

Click to Startup Settings

Click the Restart button

Choose the Disable Driver Signature Enforcement and hit the Enter key to start Windows

You should now be able to install the driver needed. After the driver installs, you can reboot the computer and it should revert back to enabling driver signature enforcement again.
