- Optimize your processes by means of the PR9, so that you can ensure continuous medical attendance.
- Make just a complete check-up and thorough investigation of the PR9.
- We are pleased to support you in this process!

Innovation and Quality -Made in Germany

Since 1992, the PSi Group has manufactured professional dot matrix and laser printers for continuous forms printing. At the headquarters in Freudenberg, Germany, a team of experienced engineers develops mechanics, electronics and firmware for PSi printer products. These disciplines in conjunction with a most modern production facility and well-trained and motivated employees generate the decisive advantages in guality and reliability.

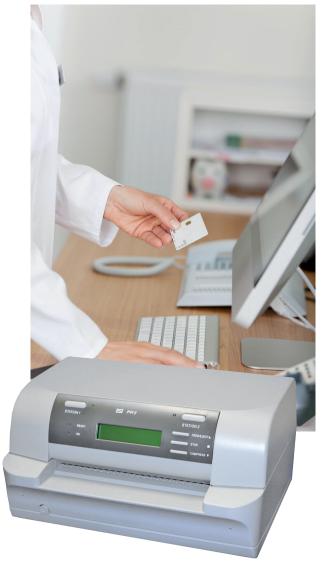

Today, numerous well-known companies in the area of industries, in particular automotive, logistics, financial and IT services trust in proven printer technology of PSi Matrix GmbH.

RELIABILITY

The PR9 is a flexible fled bed printer in a compact and modern design.

An automatic document edge sensing and alignment allows a fast and reliable printing of diverse medical documents like:

- prescriptions
- certificates of disability
- vouchers
- ile cards (patients)
- passports of diabetes, allergy and maternity
- books of immunization proof
- billing
- cost schedules

ECONOMY

In times of tight cash you cannot disregard the care of your patients and your equipment. Invest in modern hardware like the cost-saving PR9.

A durable print head and long-living consumables as well as the user-friendly operation keep the total cost of ownership extremely low.

SUSTAINABILITY

Numerous end users of medical care already decided in favour of the PR9 and are highly content with this document printer.

The PSi PR9 works with every established software for medical practice, laboratories and health care.

Due to the ongoing development and extensions of the printer functions by PSi Engineering GmbH, a subsidiary of the PSi Group, this medical printer ensures a trouble-free and reliable operation in future.

The PSi PR9 was designed for a long life-time and is produced by a certified company.
