

THE RIGHT CHOICE

PP 80x dot matrix printers – extremely reliable and cost-effective for ambitious high volume printing.

Whether logistics, industry, administrations or retail – in applications where a need is in professional and mission critical printing onto fanfold paper or cut sheets, with or without copies, the dot matrix printers of the PP 80x family are the optimal solution. Even in rough industrial environments, the PP 80x printers will prove their reliability and durability for high volume printing.

For printing of freight and customs documents, lists of loading or delivery notes in combination with barcodes, the inexpensive and durable ribbons will keep the costs of printing at a minimum. The printing costs per page are significant less than compared with other technologies like laser and thermal printing.

Innovations and Quality - Made in Germany

Since 1992, the PSi Group successfully markets professional dot matrix and laser printers for printing onto cut sheets, form sets and fanfold paper. The products are designed and produced at the premises in Freudenberg, certified according to ISO 9000.

Experienced staffs build the printers in a modern production facility and let the product excel with regard to quality and reliability „Made in Germany“. Thus numerous of national and international successful companies in industry, logistics, retail, services and IT rely on the modern printing technology of PSi Matrix.
