The
printing solution
for disposal, waste and the recycling industry

Innovations and Quality –
Made in Germany

Since 1992 the PSi-Group produces professional dot matrix and laser printers for the continuous printing.

The mechanics ,electonics and firmware are developed and perfected. At Freudenberg site situated in North Rhine-Westphalia in Germany. These synergic effects in combination with up to date production lines and highly experienced employees provide us with substantial advantages in quality and reliability.

Many popular companies in furniture manufacturing, automobile industries, logistics, financial service providers and IT industry rely on modern printer technologies developed by PSi Matrix GmbH.

For your information:

Technical data sheets for the described printer model PP 803 as well as other print solutions are at your disposal under the tab "products" on our website www.psi-matrix.eu.

Tough – reliable in rough environments

Like all PSi printers the PP 803 is extremely easy to control. He is particularly well protected against dust and dirt through his solid metal build. Stressful downtime of the system is eliminated.
The PP 803 printer is suited for all critical applications where time and business processes are crucial.

The universal interface concept of the PP 803 printer enables the connectivity in nearly every system environnement.

PP 803

PSi Matrix

Accompanying and transfer papers efficient printing

## ❯ Sprinter with little feet

PSi dot matrix printer are well known for their robust and compact build. The PP 803 has a small footprint and can even be placed in kiosk terminal solutions easily. The PP 803 printer is one of the fastest and most modern printers of its' class.

PP 803 with optional printer stand and second tractor cassette

At a glance:
• Super high printing output :
  600 cps, 500 pages per hour
• compact build, space-saving design

❯ An all round clear solution – from the first to the last carbon copy

The flexible paper feed of the PP 803 is truly unique. Besides the standard continuous paper feed this printer offers a second optional paper feed for continuous paper as well as a single paper feed with front or back side output. Additionally with an integrated cutter for the separation of continous forms or separation of print jobs is available.
Therefore, this printer is particularly suited for use in floor scale and Kiosk systems.
The high quality print output secures the legal obligations for the tracking of hazardous waste.
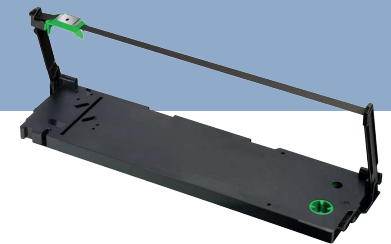

Optional papercutter of PP 803

At a glance:
• Clean print fonts and barcodes including QR-Codes
• Copies in first-class quality
• Flexible paperfeed
• Optional cutter (PP 803)

❯ Don't save efficiency, save costs.

Not only because of its attractive purchase price, but also because of its low consumption costs the PP 803 printer is one of the most economic dot matrix printers on the market. This is caused by the high security against downtime as well as the long lifespan of the ink ribbon cartridge (15 Mio. characters) and the longevity of the print head (400 Mio. characters).

These elements result in achieving maximum performance while at the same time generating very low printing costs and extremely short set-up times through easy-to-use technology.

Longlife ribbon PP 803

At a glance:
• Low purchase price
• XXL-ink ribbon cartridge with high operational performance
• High reliability and long lifetime
